21.6.50

The Municipal Engineer,

Davangere City Municipality, Davangere

ir,

I the undersigned beg to bring the following few lines or your kind consideration and favourable orders

I beg to state that the two neighbouring Pump House - perators, who are in charge of small pumping units (viz , O H P., 15 H.P., 12 H P ,) and working for only few hours of the day are drawing higher salaries than myself I am in - charge of a pretty big station consisting of 116 H.P. High Lift Pumping set, 40 H P. two Low lift pumping sets, 7.5 H.P. two Rake motors, 150 B H P.Diesel oil Engine set, working the plant all the 24 hours of the day, and looking after the pipe lin work from Pump House to Bathi Village. Even though I am discharging the duties entrusted to the entire satisfaction of my superiors by takin shifts and attending the trouble in all odd hours of the day, I am drawing only Rs 60/- per mensem, whereas the Chief Operat of other Pumping stations, who are doing similar work like myself are drawing higher salaries in the grade of Rs 100-10-150. Secondly in addition to the routine duties, I have to look after the erection of the newly received Low Lift Pumpin set of 1125 g.p m. and also 160 H P.motor.

Considering my work and also the meager pay that I am - drawing, I request you to kindly review my case and grant me an higher grade similar to the Chief Operators of other stations.

For which act of kindness, I shall be ever grateful to you.

Yours faithfully.

Harihar

MSWasey 1/6/50
Head Driver,
Davangere Water Works,
Harihar

R. 2894/50-51

M & W 100 330/7-6-50

Submitted for kind perusal and consideration As the works in the pumping Stations have increased enormously and the grade of the Senior operater P/Hand Dr

may be revised to Rs100-10-150 and the present Senior operator may be promoted to this grade as he is working enthusiastically and managing the pumping station efficiently.

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE

GENERAL AND REVENUE DEPARTMENTS

G O No L 12002 17—Ml 163 42 55, dated 12th June 1945

Water Works Establishment

Orders the confirmation and the revision of the scales of pay of certain —— under the Bureau of Sanitary Engineering

READ—

Correspondence ending with letter No C 827 23—41 42 dated 22nd February 1945 from the Director of Public Health in Mysore forwarding proposals in regard to the confirmation of the establishment of the several water supply installations in the State under the Bureau of Sanitary Engineering

2 Letters from the Deputy Commissioners of Districts the President City Municipal Council Mysore and the President Kolar Gold Field Sanitary Board on the subject

ORDER No L 12002 17—ML 163 42 55, DATED BANGALORE, THE 12TH JUNE 1945

The question of placing on a permanent basis the services of the establishments attached to the water supply works of the Local Bodies under the control of the Bureau of Sanitary Engineering, which is being continued as work charged establishment, has been under the consideration of Government for sometime past

There are at present 32 water supply installations under the Bureau of Sanitary Engineering including those of the Kolar Gold Field, the Vani Vilas Water Works at Mysore and the Shimoga Water Works The staff of operators and drivers of the Kolar Gold Field, the Vani Vilas and the Shimoga Water Works are borne on the permanent establishment of the Public Works Department The services of the other work charged establishment in these three water works as also of the operating staff in the other water supply installations are neither permanent nor pensionable and the pay of such staff is entirely borne by the Local Bodies concerned

The Director of Public Health has proposed to place, on a permanent basis, the services of the operators, drivers, assistant operators, assistant drivers, fitters and helpers drawing a pay of Rs 16 and above, meter readers and bill collectors and to revise the scale of their pay by classifying the installations as class I, II, and III as noted below according to the amount of the annual maintenance charges of each installation —

CLASS I

Operators	Rs 40 4/2 56
Assistant Operators	Rs 24 4/2 40
Fitters	Rs 20—1—25

CLASS II

Operators	Rs 40 4/2 56
Fitters	Rs 20—1—25

CLASS III

Assistant Operators	Rs 24 4/2 40
Fitters	Rs 20—1—25
Helpers and Meter-readers	Rs 20—1—25

No L 12002 17—ML 63 42 55, DATED 12TH JUNE 1945

The opinion of the concerned Local Bodies was called for as to their willingness to adopt the above suggestions of the Director of Public Health Of the 30 Local Bodies who furnished their opinion in the matter, the under mentioned twelve Local Bodies have agreed to adopt the proposal in toto, while certain others have agreed to it subject to certain conditions and a small minority of them are not willing to accept the same —

1 The Tumkur Town Municipal Council
2 The Hassan do
3 The Arsikere do
4 The Holenarsipur do
5 The Saklespur do
6 The Arkalgud Minor Municipal Council
7 The Shikarpur Town Municipal Council
8 The Chintamani do
9 The Chitaldrug do
10 The Nagamangala Minor Municipal Council
11 The French Rocks do
12 The Kolar Gold Field Sanitary Board

Government have examined the question in all its aspects and they agree with the views expressed by the Director of Public Health that the revision of the scale of pay proposed would obviate the difficulty that is now being experienced in securing trained hands and reliable operating staff and the uniformity of scales would also facilitate transfers and improve considerably the efficiency of service This arrangement would bring these officials on a par with those employed in the Public Works Department They are accordingly pleased to sanction as proposed above the revision of the scale of pay of the establishments attached to the water supply installations of the 12 Local Bodies who have agreed to the same with effect from 1945 46 and also to direct that their services be treated as permanent

The Deputy Commissioners of the Districts concerned are requested to arrange for the necessary provision being made in the budgets of the respective Local Bodies to meet the extra cost involved on this account from the next official year and onwards

Government hope that the other Local Bodies would ere long recognize the need for falling in line with the aforesaid Local Bodies in this behalf and agree to the adoption of the revised scale in respect of the water supply installations under their control

C NARAYANASWAMY NAIDU,
Secretary to Government,
Law Department

To—The Director of Public Health in Mysore — 2
The Deputy Commissioners of Districts — 5
The Comptroller to Government through the Financial Department — 2

10 Government Order No P W 4449 54—Est 147 46 2 dated 30th September 1947 sanctioning the re distribution of the jurisdiction of the three circles Mysore Shimoga and Tumkur

11 Government Order No P W 9561 8—1 st S 46 21 dated 9th April 1948 sanctioning the Re organisation of the Bureau of Sanitary Engineering

ORDER No 2793 2892—C B 93 49 1, DATED BANGALORE, THE 27TH SEPTEMBER 1949

There is at present one set of Engineers maintained for Roads and Buildings and another set of Engineers for Irrigation and a third set for Water Supply and Drainage Works Many a time one Engineer (Roads and Buildings) stationed in one place will have no jurisdiction over tanks in that area and in consequence there has been dispersal of energy There are also other agencies for undertaking works that ought to be undertaken by the Public Works Department, *viz*, the Revenue Department in the rural development section and the District Boards for maintenance of their roads and buildings With a view to avoid duplication of agency often entailing loss of time and delay in transmission of papers from one section to another, the entire field should be under one agency responsible for the due execution of all engineering and other allied works This will also facilitate the execution by the Public Works Department expeditiously of roads, I V C roads, drainage, well works, village layouts coming under rural development and other Departments This Public Works Department therefore needs re organisation

2 There is no need to have one Chief Engineer for Irrigation and another for Roads and Buildings Both the Irrigation and Roads and Buildings Sections can be combined into one and placed under one Chief Engineer The other Chief Engineer will be designated Special Chief Engineer for development works like the Lakkavalli, the Tunga and other new development works The Special Chief Engineer will devote himself to the complicated questions regarding the Cauvery and the Tungabhadra river valleys that are pending settlement He will devote more time for the preparation and scrutiny of projects to develop further areas under the schedule rivers, permitted under the 1924 Agreement This Special Chief Engineer's post will be retained for a period of 3 years or more and this Chief

Engineer will function also as Secretary to Government which post is now held by an officer of the rank of Superintending Engineer The Special Chief Engineer will be given the assistance of one of the Assistant Engineers sanctioned for the special works

3 The Permanent Chief Engineer will be in charge of Irrigation, Roads and Buildings and Water Supply and Sanitary Bureau He will be given the assistance of a Superintending Engineer who is designated as Deputy Chief Engineer to look after all routine and simple matters which do not call for the special attention of the Chief Engineer

4 *Basic Organisation of the Chief Engineer s Office* —Three Technical Assistants of Assistant Engineers grade will be attached to this office, one for Roads and Buildings, one for General Irrigation and one to deal with K R S and other special matters A gazetted officer of the Assistant Commissioner s cadre drawn either from the Civil Service or an officer of corresponding status from the Public Works Department will be attached to the office to deal with the routine non technical matters in the current section The Government Architect will continue as hitherto To help the various sections, 8 Graduate Surveyors are allowed to the Chief Engineer s Office

5 *Basic Circles in charge of Superintending Engineers* —The State will be divided into three permanent basic circles as indicated below —

(1) *The Cauvery Circle* comprising the Mysore District, the Mandya District, and Hole Narsipur and Arkalgud Taluks of Hassan District with head quarters at Mysore

(2) *Shimoga Circle* comprising the remaining Taluks of Hassan District, Chikmagalur District, Shimoga District and Chitaldrug District with headquarters at Shimoga

(3) *Tumkur Circle* consisting of Tumkur, Kolar and Bangalore Districts with headquarters at Tumkur or Bangalore

6 The Water Supply Division and the Bureau of Sanitary Engineering are at present under the direct control of the Chief Engineer These two divisions will be included in the Tumkur Circle and will be continued for about a year to complete the works under execution expeditiously The two divisions will be combined into one after June 1950 It should however be noted that all works connected with the Water Supply and Bureau of Sanitary Engineering should ultimately be got executed through the agency of the existing divisions unless special works costing about a lakh of rupees and more, are sanctioned in which case a temporary Sub Division may be created

7 *Temporary Circles* —The Superintending Engineer of the temporary Lakkavalli Reservoir Circle will continue to be in charge of Lakkavalli Project and its allied works There is another circle recently created for the execution of works of the Electrical Department The question whether the circle should be under the Electrical Department or under the Public Works Department will be further examined

These two circles will, however, be abolished after the special works are completed

8 *Divisions* —There are at present 17 permanent and 8 temporary divisions These are now distributed as under, having regard to administrative convenience and expeditious execution of works —

	Basic Permt Divisions		*Temporary Divisions*
Cauvery Circle	6	plus	2 (1 for Nugu)
Shimoga	4		2
Tumkur	5		0
Lakkavalli	0		3
Electrical	0		2
	15	plus	9

The temporary divisions will be abolished after the full development of river valleys and other special works

9 *Sub Divisions* —Having regard to the area of each Taluk, the numbe tanks therein and the quantum of road and other works pertaining to Public W Department, Rural Development, District Boards, etc , the Sub Divisions are forr There is no need to have separate establishment for Rural Development, I V C rc and District Boards after the new set up is established There are at present

permanent plus 69 temporary Assistant Engineers and 4 Honorary Assistant Engineers, *i e*, in all 134 These are distributed as shown under —

Basic Sub Divisions	62
Water Supply Sub Divisions	4
Sanitary Sub Divisions	2
Chief Engineer s O ffice	3
Circle Offices	3
Assistant Engineers to sanctioned special Sub Divisions	42
	116

10 *Non Gazetted Staff* — Considering the area of each Taluk, the number of tanks and the quantum of other works in each Taluk, it is essential that a Graduate Surveyor should be posted to each Taluk except in the case of Alur and Kumsi Taluks, which being small in area may be added on to the adjacent taluks The distribution of non gazetted staff is as indicated below —

Surveyors at the rate of 1 for each Taluk as Section Officers	80
Project Sub Divisions under all the 18 divisions including the Water Supply and Sanitary Bureau—one Graduate Surveyor for each of these divisions	18
2 Graduate Surveyors are given for each of the 3 Basic Circle Offices for scrutiny of projects	6
Graduate Surveyors to the Chief Engineer s Office	8
Graduate Surveyors to work as Section Officers for supervision of all the river channels in the S ate	28
Temporary Graduate Surveyors to be continued in charge of works as per present sanction	93
To attend to large number of minor tanks to be restor d in the Districts of Kolar Hassan Shimoga and Chickmagalur	9
	242

against the existing strength of 267 Graduate Surveyors including temporary hands

Sub Engineers —The Sub Engineers, whose existing strength is 10, will be posted to important special works

Overseers —The permanent strength of 66 Overseers will be retained Out of these, one Overseer will be posted to each division for the preparation and scrutiny of projects

Sub Overseers —There are at present 668 Sub Overseers including men shown in Rural Development Railway Cess Works, I V C Works, etc The distribution of the Sub Overseers will be, as under —

One Sub Overseer for each Hobli in 129 Malnad Hoblis (Malnad areas of Heggaddevankote Hunsur Periyapatna Chamarajanagar and Gundlupet are also included)	129
One Sub Overseer for 2 Hoblis of Maidan area	120
There are at present 118 Sub Overseers in the Visvesvaraya Canal area and it is proposed to reduce the number to 90	90
Vani Vilas Sagar Channel	5
Existing Sub Overseers in Bangalore Buildings Division	12
Existing Sub Overseers in Water Supply Division	4
Bhadra Channels	2
One Sub Overseer for each division including Water Supply Division	18
Leave Reserves	27
	407
Temporary Sub Overseers as per existing sanction for special works	201
Total	608

against the existing strength of 668 Sub Overseers This arrangement will enable the posting of a Graduate Surveyor, an Overseer and one Sub Overseer to each division for preparation and scrutiny of new projects

General Stores —Having regard to the large quantities of materials like steel cement, timber, tools, spare parts, pipes, etc , handled year after year, it is necessary to organise a Central Stores Section as in the case of the Electrical Department An officer of the status of an Executive Engineer should immediately be placed on special duty to organise this section The post of the Under Secretary attached to the Secretary s office should be re-trenched and an Assistant Engineer posted to that

charge The post of Executive Engineer thus saved may be utilised for organising the Stores Section After this section is satisfactorily organised, one of the Executive Engineers released by combining the Water Supply Division and the Sanitary Bureau may be posted to be in charge of the Central Stores

Mechanical Section —There are at present about 150 lorries, 40 road rollers stone crushers, cement concrete mixers, etc , and there being no proper arrangement for repairs to and maintenance of this equipment the present arrangement, it is feared, would lead to wastage and loss to the Department Till a central agency of the Government is created for this purpose, small maintenance units will be set up in all the district headquarters These units will be under the Executive Engineers

Grow More Food Campaign —In view of the urgent need to develop lift irrigation in river valleys and other small projects as a short term plan, eight Assistant Engineers eight Graduate Surveyors and eight Sub Overseers with the necessary staff for surveying and preparation of projects would be posted without any loss of time The Chief Engineer will submit immediately proposals for the formation of lift irrigation sub divisions which will be under the Executive Engineers of the respective divisions These projects should be got executed through the existing staff and no extra staff will be allowed

By the re organisation of the Department in the manner indicated above, there will be a saving in cost corresponding to the reduction in the strength by a Superintending Engineer, 18 Assistant Engineers, 25 Graduate Surveyors and 60 Sub Overseers

The officers and subordinates thus retrenched will be absorbed in the sanctioned special works such as the Lakkavalli Circle, Electrical Circle and other special works for which full complement of establishment has not yet been posted Due provision will however be made for the staff required for special works

11 For the expeditious execution of work and for payment to be made without inordinate delay, it is necessary to liberalise the powers of sanction of Engineers The powers as now enhanced are as indicated under —

(*a*) Assistant Engineers —May sanction works up to Rs 500 for repairs with the appropriate safeguards
(*b*) Executive Engineers —May sanction works up to Rs 5 000
(*c*) Superintending Engineers —May sanction works up to Rs 10 000
(*d*) Chief Engineers —May sanction works up to Rs 15 000

The Chief Engineer will examine the question of delegating powers to gazetted officers below him with a view to have disciplinary control over their subordinates

12 Government are, after careful consideration pleased to sanction the re organisation of the Public Works Department as set forth in the foregoing paragraphs of this Order

13 The Chief Engineer is requested to submit immediately proposals for redistributing the officials and others among the officers as now re organised, indicating specifically the surplus hands and how he proposes to absorb them

14 As it will take some time to redistribute the staff including the officers among the several offices and works as laid down in the foregoing paragraphs of this Government Order the Comptroller and the Auditor, Public Works Department, are requested to admit in audit their salary and other bills as hitherto till then

G O No P W 5906 10—Est 37 49 8 dated 28th December 1949

Distribution of Work under the Re organisation

Approves the —— Scheme among the Special Chief Engineer, the Chief Engineer of Mysore and the Deputy Chief Engineer

---

READ—

Government Order No 2793 2892—C B 93 49 1 dated 27th September 1949 sanctioning the re organisation of the Public Work Department

2 Letter No 4913—E dated 15th December 1949 from the Chief Engineer for Irrigation forwarding a statement showing the distribution of the office establishment among the administrative offices in the new set up

ORDER THEREON No P W 5906 10—EST 37 49 8, DATED BANGALORE, THE 28TH DECEMBER 1949

Now that the appointments of the Special Chief Engineer and the Deputy Chief Engineer have been notified, Government are pleased to approve of the distribution of the work among the Special Chief Engineer, the Chief Engineer and the Deputy Chief Engineer as shown in the Annexure 'A

2 As the two offices *viz* Roads and Buildings and Irrigation Branches have been combined into one under the Re organisation Scheme Government direct that the designation of the officer in charge of the combined office be Chief Engineer of Mysore He will be in charge of General Irrigation, Krishnaraj Sagar Regulation, Distribution and Visvesvaraya Canal Distribution, Roads and Buildings, Water Supply and Drainage and the works under 'Grow More Food Scheme' noted in the Annexure

3 Proposals for re distribution of existing office establishment among the various Divisions and Sub Divisions under the new set up are under consideration separately In the meantime Government are pleased to approve the distribution of the existing office establishment among the several administrative offices contemplated in the new set up, as shown in the Annexure 'B

4 In regard to the contingent grant and T A grant neces ary for the Special Chief Engineer, Government feel that it is not necessary to have separate grants at this part of the year The necessary contingent articles will be purchased by the Special Chief Engineer and the bills including T A bills) will be passed on to the Chief Engineer for being met from the respective grants now at his disposal

5 As the works pertaining to the Grow More Food Scheme are of an emergent nature, they have to be attended to with all promptness The establishment being under the control of the General Chief Engineer, he is requested to issue instructions to the local and subordinate officers to give top priority to such works and execute them with all speed and also references from the Special Chief Engineer so that the maximum benefit may be derived in the promotion of production of foodgrains Government expect that the Chief Engineer of Mysore will work in closest co operation with the Special Chief Engineer

6 In regard to the following ten works, which will be under the control and supervision of the Chief Engineer of Mysore as hitherto, the Special Chief Engineer will, in consultation with the Chief Engineer of Mysore, study these works and submit very early a note to take up such portion of the project works as could be completed by the end of March 1952 so as to bring under irrigation the area to the utmost extent possible by then —

(1) Honnemachanahalli tank
(2) Marconahalli Reserv ir R B Channel
(3) Irksandra tank
(4) Muthukadur tank

PROCEEDINGS OF THE GOVERNMENT OF MYSORE.

Read:-

G.O.No.L.11025-7/Rl. 105-48-101 dated the 25th March 1949 sanctioning, among others, the revision of the scale pay of the two Operators attached to the Davanagere Water Works from Rs.60-5/2-90 to Rs.50-5-100.

2.Letter No.M.C.83/50-51 dated the 27th October 1950 from the Municipal Commissioner, Davanagere City Municipality, forwarding for sanction the resolution dated the 21st June 1950 of the Municipal Council recommending further revision of the scale pay of the Senior Operator Sri M.Narayana Swamy, to Rs.100-10-150 for the reasons stated therein.

3.U.O.Note No.10746 dated the 17th February 1951 from the Chief Engineer of Mysore on the subject.

ORDER NO.L. 1088 / Com S 51 2

DATED BANGALORE, THE 8th MAY 1951.

The above resolution of the Davanagere City Municipal Council to give Sri M.Narayana Swamy, Senior Operator, the enhanced grade of Rs.100-10-150 is sanctioned. This promotion is purely on a tenure basis so long as he continues in the Davanagere Water Works without prejudice to his seniors in the Department.

M Srinivasa Murthy
Secretary to Government,
Local Self Government Department.

To

The Municipal Commissioner, Davanagere City Municipality. (Through the President)
The Chief Engineer of Mysore, Bangalore.
The Examiner, Local Fund Accounts, Bangalore.
The Accountant-General in Mysore, Bangalore.
